

Quickly Screen Public Safety Personnel

Introducing EyeDetect — screen your job applicants and law enforcement personnel *in just 30 minutes.*

Preserve Your Reputation

Law enforcement agencies are tasked with the critical responsibility to safeguard citizens and communities. But it all starts by effectively pre-screening job applicants and periodically screening all current personnel, without bias, for positions such as police officers, sheriffs, dispatchers, jailers, etc.

If your agency uses a Law Enforcement Pre-Employment Test (LEPET), you can rely on a new lie detection technology called EyeDetect to help automate and greatly streamline the credibility assessment phase of the hiring process. The EyeDetect LEPET can be customized to meet your specific needs. It accurately measures the truthfulness about an applicant's past drug history, criminal behavior (whether caught or not), and accuracy when completing the job application, or any other critical issue of concern.

Best of all, EyeDetect never gets tired or influenced. It's 100% unbiased and will never discriminate on the basis of gender, race or color.

What is EyeDetect?

Deception causes subtle changes in the behavior of the human eye due to increased cognitive load. EyeDetect uses a high-speed eye tracker to measure these subtle changes, and then combines the measures in a mathematically optimal manner to detect deception with an 85% accuracy. When combined with polygraph, the outcome confidence reaches 99%.

How EyeDetect Makes Screening Law Enforcement Candidates Easier

-  **Dishonest Candidates** – quickly eliminate candidates showing signs of deception.
-  **Honest Candidates** – focus on candidates with no indicators of deception.
-  **Unbiased** – EyeDetect is automated and will not show bias or discrimination.
-  **Fast Results** – tests take 30 minutes and results are ready within 10 minutes.
-  **Nonintrusive** – no uncomfortable cables or sensors are attached to the examinee.
-  **Easy to Train Proctors** – an EyeDetect Test Proctor and Dashboard Administrator can be trained in less than 3 hours.
-  **Efficient** – one test proctor can perform up to 40 tests per day with 4 EyeDetect stations.
-  **Portable** – EyeDetect instruments are portable and can easily be moved to other locations.

How EyeDetect Works

1. Examinee takes 30-minute true/false test.
2. Data captured, encrypted and uploaded to a secure server in the cloud.
3. Proprietary algorithms interpret the data and provide a report with the Converus

EyeDetect Station Includes:

- Microsoft Surface Pro 4 tablet, mouse and keyboard
- High-speed, infrared eye-tracking camera
- A library of custom tests for law enforcement, corrections and DAs
- Chin rest
- Technical support (business hours)
- Test scoring licenses that don't expire
- Software updates

“We think that we will have a better screened candidate who will be a better employee for the department for years to come.”

– Lt. LaMar Ewell, Salt Lake City Police Dept.

Converus (“with truth”) is committed to providing trustworthy credibility assessment solutions. Its flagship product, EyeDetect® — a product first conceived in 2002 — is the first ocular-motor deception detection solution. It’s an accurate, cost-effective, efficient, secure and nonintrusive method that detects deception in 30 minutes by analyzing eye behavior. The same scientists credited with computerizing the polygraph in 1991 developed EyeDetect. It’s a new way for organizations to manage risk and ensure workplace integrity, and for law enforcement agencies and governments to detect deception. Ultimately, it helps protect countries, corporations and communities from corruption, fraud and threats.
