

# Detect Deception Quickly and Accurately

Introducing EyeDetect — screen job applicants and employees, security and law enforcement personnel, parolees, refugees and visa applicants *in just 30 minutes.*

## What is EyeDetect?

Deception causes subtle changes in the behavior of the human eye due to increased cognitive load. EyeDetect uses a high-definition, infrared eye-tracking camera to measure these subtle changes, and then combines the measures in a mathematically optimal manner to detect deception with an 85% accuracy.

Without effective screening, visa applicants and refugees can pose a threat to national security. Dishonest and/or unethical security, law enforcement and corrections personnel can wreak havoc upon an organization. Parolees not regularly screened can harm communities. EyeDetect can successfully “see truth” and help keep countries, workplaces and communities safe.

## EyeDetect is Ideal

### ■ Screening

- job candidates, employees
- law enforcement, security personnel
- refugees, visa applicants
- parolees, probationers (including sex offenders)

### ■ Polygraph Examiners

- EyeDetect can quickly screen large groups
- follow-up with polygraph for higher accuracy
- offer additional services

## Why EyeDetect is a Revolutionary Lie Detection Method

- Innovative** - First deception detection method that effectively monitors subtle changes in the eyes to “see truth.”
- Fast Results** - Tests take 30 minutes and results are ready within 10 minutes.
- High Accuracy** - Classifies examinees as truthful or deceptive with at least 85% accuracy.
- Nonintrusive** - No cables or sensors to attach to the examinees.
- Simple to Use** - An EyeDetect Test Proctor and Dashboard Administrator can be trained in less than 3 hours.
- Incorruptible & Unbiased** - The human-based examiner element is eliminated, and the data are encrypted in real time.
- Bank-level Secure** - Same encryption and physical security that banks use.
- Scalable** - An EyeDetect test proctor can monitor up to 40 examinees per day.
- Flexible & Portable** - Adaptable to your organization's needs. You can use EyeDetect on-site, send examinees to an authorized testing center, or take it to remote offices.
- Multilingual** - Tests are available in various languages.

**Economical** - You save by having one person administer a large number of tests per day. Plus, the short test time minimizes opportunity costs.

**Complete Analytics & Reporting** - Reports are ready within 10 minutes. Group test results may be filtered by date, department, test type, credibility score and more.

## How EyeDetect Works

1. Examinee takes 30-minute true/false test.
2. Data captured, encrypted and uploaded to a secure server in the cloud.
3. Proprietary algorithms interpret the data and provide a report with the Converus Credibility Score within 10 minutes.

*“We have confidence in the technology.”*  
- Karla Hernandez, MFM Manager of HR

\* The Employee Polygraph Protection Act (EPPA) prohibits using lie detectors like EyeDetect in private companies. However, federal, state and municipal government employees or contractors may be tested.

Converus (“with truth”) is committed to providing trustworthy credibility assessment solutions. Its flagship product, EyeDetect® — a product first conceived in 2002 — is the first ocular-motor deception detection solution. It’s an accurate, cost-effective, efficient, secure and nonintrusive method that detects deception in 30 minutes by analyzing eye behavior. The same scientists credited with computerizing the polygraph in 1991 developed EyeDetect. It’s a new way for organizations to manage risk and ensure workplace integrity, and for law enforcement agencies and governments to detect deception. Ultimately, it helps protect countries, corporations and communities from corruption, fraud and threats.
