Press Quotes
The press have been fascinated by the EyeDetect technology. Here are a few of their comments. (Click on logo for link to story.)

Described as “advanced lie detection technology”, the department has said it will help in its fight to “take the profit out of crime, while maintaining the highest standards of integrity of its personnel.”

“Converus is marketing a new lie detecting product called EyeDetect, which the company claims is 85% accurate, or 95% accurate when combined with other manners of lie detection. It is already being used by government officials in some Latin American countries for screening political candidates.”

“A new technology, EyeDetect, measures eye responses to detect truthfulness.”

“New system pitched to Trump’s team tracks involuntary movements to reveal the truth in half the time of a polygraph.”

“Now law enforcement has a new tool in an effort to get the truth. It’s a new lie detection technology called EyeDetect.”

“They say you can tell if a person is lying by watching their eyes. A new lie detector is putting that theory to test.”

“The company has touted its technology as an effective way to help investigate whether any terrorists have infiltrated the ranks of refugees coming into a country.”

“You may never be able to tell a little white lie again. Investigators say they have a new way to tell if you’re fibbing, and it does not involve a lie detector.”

“It’s all in the eyes. Reading a liar’s eyes, in fact. It’s called EyeDetect.”

“ Authorities in Ohio have a new way to tell if you’re telling the truth.”

“It’s being called the ‘Pupil Polygraph’ and it can be used with or instead of the traditional lie detector test.”

“It’s really interesting. You don’t even have to say a word. The test can determine if you’re lying by looking at your eyes.”

“A new type of lie detector test scans your eyes to determine whether or not somebody is lying or telling the truth. It’s called ‘EyeDetect,’ and it’s one of the crime-fighting technologies that was on display here in San Diego this week at the Police Chief’s Convention.”

“You really can’t hide your lying eyes. A brand new type of lie detector that scans your eye boasts an 85% accuracy rate.”

“ Turns out your eyes do give you away after all. When we lie, it takes more mental effort, more energy. And that effort causes our pupils to dilate ever so slightly. You can’t see this change with the naked eye, but according to researchers it happens every time someone lies. Now a company called Converus is giving this pupil change a closer look.”

“Now let’s get you to a story that sounds a bit like science fiction. A computer program that scans your eyes to see if you are lying. Law enforcement agencies around the country are using this technology to screen suspects and companies are screening potential employees.”

“Today local police departments got their first look at a new technology meant to make us all safer. The company, Converus, is now using EyeDetect to see if suspects are lying.”

“The company, Converus, is bringing a new type of lie detector to the world.”
Converus has had more than 300 stories about its credibility assessment technologies. Here's just a sampling.
