Message from Converus President and CEO

Recapping the Great News from Our Recent Conference

New innovations, new milestones, and newrenewed friendships.

That's just a portion of what attendees at our 5th Annual Converus Service Partner Conference experienced in January near our headquarters in Lehi, Utah.

At the conclusion of our conference, it was more apparent than ever that Converus is well on its way to becoming a major player in the credibility assessment industry — and destined to change the way the world detects deception.

A key announcement shared during my opening remarks was the official release of the [Directed Lie Comparison (DLC) test protocol](#). This 15-minute testing technique is commonly used for diagnostic testing in criminal investigations and civil cases.

New innovations, new milestones, and newrenewed friendships. Just as polygraph, can be used in testing special cases such as sexual assault, murder, theft, burglary, sexual abuse, domestic violence, parole or treatment violations, and even infidelity. An initial field study conducted by Drs. Kircher and Raskin indicated this new testing protocol has a mean accuracy of over 90 percent.

With tests available now for screening and investigations, EyeDetect gives credibility assessment experts a complete solution. Law enforcement and others have been clamoring for this.

Other announcements Converus is solidifying its role as a major credibility assessment industry player included:

- 19% revenue growth over 2017.
- Complete support for RCT and DLC test editing now available.
- Pending release of a multi-issue, "4YI" Relative Comparison Test protocol.
- Converus is on track this year to process more EyeDetect tests than in all previous years combined.

Yes, thanks to our dedicated Converus Service Providers, board members, advisers, consultants — and especially thanks to indefatigable, loyal staff — we're well on our way to realizing our vision to "Be the leading technology provider of credibility assessment solutions."
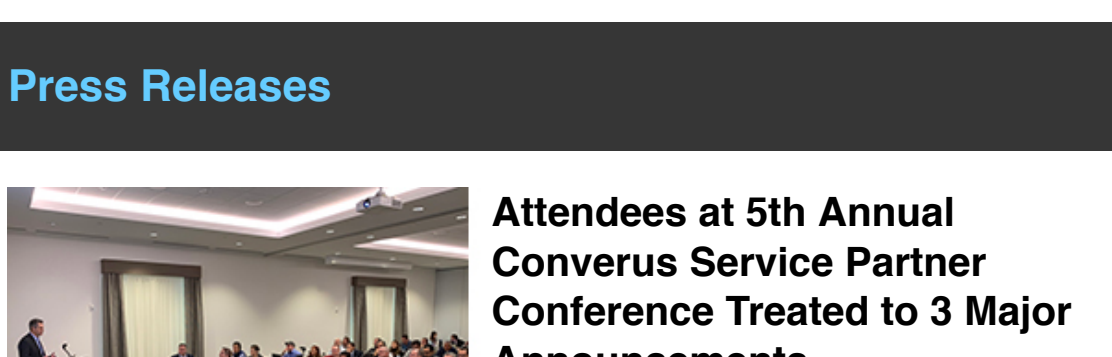

Welcome New Service Partners

I'd like to personally give a warm welcome to our new Converus Service Partner, Verity Detection Services, LLC (PA). We continue to attract the best of the best in the credibility assessment industry. (Want to become a Converus Service Partner? [Click here.](#))

Click the forward button above to send this newsletter to others interested in our advanced credibility assessment tools. And please share industry news with us! We'd love to hear from you. Email: info@converus.com.

Converus in the News

EyeDetect on French TV

On Jan. 14, a French TV station ran a segment on EyeDetect (in French, of course). This station BFM TV is France's most-watched news network with 10 million daily viewers. The station states it "boasts a market share in France that is greater than any equivalent news channel around the world."

The segment was titled, "Anthony Morel's column: An almost unbeatable lie detector." BFM TV's website posted the following with the segment: An American start-up has developed an almost unbeatable lie detector. It is a formidable device that seeks the truth from our eyes. Researchers also seriously suggest testing the reliability of their machine on American politicians. The principle is simple: the individual must answer a series of questions facing a very sophisticated infrared camera.

Press Releases

### Attendees at 5th Annual Converus Service Partner Conference Treated to 3 Major Announcements

LEHI, Utah – Feb. 26, 2019 – Despite freezing temperatures outside, attendees at the 5th Annual Converus Service Partner Conference quickly warmed up to several major announcements by Todd Mickelsen, Converus president and CEO. The most significant announcement was the official release of a new 15-minute EyeDetect Directed Lie Comparison (DLC) test protocol of EyeDetect. It will be used for diagnostic testing, which is commonly used for criminal investigations and civil cases. [READ MORE](#)

EyeDetect Can Now Be Used for Single Issue, Diagnostic Tests for Investigations

LEHI, Utah – Jan. 30, 2019 – Converus' disruptive lie detector, EyeDetect, just became more disruptive to the credibility assessment market with a new 15-minute Directed Lie Comparison (DLC) test — a test technique commonly used in criminal investigations or civil cases. This means EyeDetect can now be used in such situations as sexual assault, murder, sexual abuse of a child, spousal abuse, parole or treatment violations, or infidelity. An initial field study shows this computer-based, true/false test is 90 percent accurate. [READ MORE](#)

About Converus

Converus provides scientifically validated credibility assessment technologies. EyeDetect detects deception at 86-90% accuracy in 15-30 minutes by analyzing eye behavior. EyeDetect identifies 85% of deceptive subjects, while the automated polygraph (IdentiLie) catches 90% of deceptive individuals. Both identifies at 81% accuracy in about 1-5 minutes by analyzing subtle variations in the motor nervous system response. IntegriflyDetect™ identifies the most trustworthy individuals at 80% accuracy in 8 minutes by analyzing a person's implicit associations. These technologies help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit www.converus.com.
