

EyeDetect Helps Clients Get to the Truth Sooner So the *Real* Healing Can Begin

“EyeDetect will bring about faster results for individuals and couples as they work through areas of trust.”

Ann Brown,
Psy.D., LPC

BACKGROUND

[Life Renewal Counseling](#) / Christian Counseling Services, based in Houston, Texas, provides counseling services to individuals and couples. The practice works with many sexual betrayal situations and — as is a common trend — lie detection is often used to help get to the truth so that healing can begin for the betrayed and the betrayer. When trust is broken in a relationship, Life Renewal has found it very difficult to know where to begin the healing process. With a lie detection solution, couples get to the truth more quickly, trust can begin to be rebuilt, and decisions about their future are made with more certainty.

EYEDETECT IMPLEMENTED

Life Renewal chose to implement [EyeDetect](#) because polygraph was costly and time-consuming. Plus, there are only a few polygraph examiners in town with experience working with psychological cases and securing an appointment with them has proven difficult. “If I can better assist other counselors with their clients by using EyeDetect, I will have succeeded at providing a more valuable service,” said Ann Brown, Psy.D., LPC.

RESULTS

Clients at Life Renewal find the EyeDetect testing process very valuable. One client stated, “EyeDetect cut to the chase and I was able to have some reassurance that I was not being lied to any longer. *It gave me peace of mind and I will continue to use it if I need it.*”

RETURN ON INVESTMENT

Said Dr. Brown: “My experience working with Converus and its EyeDetect technology has been very professional. They are experts in their field. I look forward to continuing to utilize EyeDetect to help my clients arrive at the truth sooner, so that the real healing can begin. Our lie detection service is just one component of our counseling practice, but I believe EyeDetect will bring about faster results for individuals and couples as they work through areas of trust.”

Converus (“with truth”) provides scientifically validated credibility assessment technologies that help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
