EyeDetect® IdentityDetect® IntegrityDetect®

Message from Converus President and CEO

EyeDetect Featured on Dr. Phil Podcast

The excitement and momentum at Converus continue to grow. I'm not able to share all the details just yet, so stay tuned. However, I can tell you three things:

1. **EyeDetect on Dr. Phil** – Pamela Meyer, Converus Advisory Board member, was on a podcast with Dr. Phil. If you don't know, he's an American television personality and psychologist. The "Phil in the Blanks" podcast aired Feb. 26 and was titled, "Pamela Meyer – Liars and Liars." EyeDetect was discussed about 50 minutes into the 64-minute podcast. At one point, Pam said, "[EyeDetect is] computerized, scalable, inexpensive and accurate. You can't game it... This is really the future of lie detection." Thank you, Pam, for your continual great support of Converus! [Click here](#) and look for the episode titled, "Pamela Meyer – Lies and Liars."
2. **Philippines Federal Agency Adopts EyeDetect** – After a successful seminar with Russ Warner last year, Converus Service Partner [Express Order System](#) closed a deal with the National Bureau of Investigation (NBI) in Manila. NBI, the U.S. equivalent of the FBI, is the country's first government agency to adopt EyeDetect. This agency plans to use it for screening and field investigations in cases. [Press Release](#)
3. **IdentityDetect Wins Award** – Team Converus/[AML Partners](#) was one of four finalists in the 2019 MITRE Challenge on Strengthening Eligibility Verification for Federal Benefits Programs. Our entry was "Objective Eligibility Verification" technology, which featured IdentityDetect. This contest evaluated technologies that could improve identity verification of recipients of federal aid programs. IdentityDetect would be ideal to verify payments are made to appropriate persons. Many federal programs waste tax payer dollars paying people not eligible for benefits.

Welcome New Service Partners

A warm welcome to our new Converus Service Partners:

- Marpex (Mexico)

About Converus

Converus provides scientifically validated credibility assessment technologies. EyeDetect® detects deception at 86-90% accuracy in 15-30 minutes by analyzing eye and other behaviors. IdentityDetect™ detects falsified identities at 91% accuracy in about 1-3 minutes by analyzing subtle variations in the motor nervous system responses. IntegrityDetect™ identifies the most trustworthy individuals at 80% accuracy in 6 minutes by analyzing a person's implicit associations. These technologies help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA.
