Message from Converus President and CEO

EyeDetect: Right Technology, Right Place, Right Time

Hi

Converus EyeDetect is uniquely positioned to meet credibility assessment testing needs during the current pandemic:

1. **Social-distancing compliant** – Most polygraph examiners have stopped testing due to the risk of close, personal contact. EyeDetect allows examinees to stay a safe social distance from the test proctor using an app called EyeDetect Manager.
2. **Easy to clean after each test** – The only EyeDetect equipment examinees must touch during a test is the computer mouse, which is quick and easy to clean. Headphones and chinrest are optional, based on testing conditions.
3. **Substantial savings in time and money** – With an economy in shutdown, reducing costs wherever possible is crucial. An EyeDetect test only takes 15-30 minutes and costs up to 60% less than polygraph.

Cost savings example: The Spokane County Sheriff's Office is one of dozens of U.S. law enforcement agencies using EyeDetect to screen job candidates. Testing with EyeDetect at the beginning of the hiring process helps quickly identify the best applicants. Dismissing unqualified candidates early eliminates about 40 hours of background checks and polygraphs, which saves about $2,500 per candidate.

Learn how EyeDetect is the only social-distancing compliant lie detector with accuracy comparable to polygraph: watch this video and read this press release. And, please check out our new flyer: How to Safely Conduct Lie Detection Tests During the Viral Pandemic

Above all, I hope and pray you and your loved ones are safe during this unprecedented health crisis.

Welcome New Service Partners

A warm welcome to our newest Converus Service Partners:

- Ohio Polygraph (Ohio)
- Clark-Dye & Associates (Ohio)
- Nichimen Resources Sdn Bhd (Malaysia)

July 19-20, 2020
FBINAA National Annual Training Conference and Exhibition
(New Orleans, LA)

About Converus

Converus provides scientifically validated credibility assessment technologies. EyeDetect® detects deception at 86-90% accuracy in 15-30 minutes by analyzing eye and other behaviors. IdentityDetect® detects falsified identities at 91% accuracy in about 1-3 minutes by analyzing subtle variations in the somatic nervous system. These technologies help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: www.converus.com
