Message from Converus President and CEO

EyeDetect Becoming the Go-To Technology for Screening Personnel, Probationers and Parolee

U.S. law enforcement agencies use EyeDetect to effectively screen new job candidates and lateral transfers to assure the most trustworthy personnel are hired.

And departments of corrections are turning to EyeDetect because it's fast, accurate and affordable.

Specifically, EyeDetect helps departments of corrections to:

1. Hire and maintain trustworthy staff.
2. Ensure probation and parolee compliance.
3. Manage internal affairs investigations.

To see how EyeDetect helps preserve a department of correction's reputation, watch [this video](#).

This [case study](#) shows how a department of corrections in Ohio benefits from EyeDetect.

Our free app, EyeDetect Manager, makes it possible to test while maintaining a safe physical distance. This ensures testing continues, even during the current pandemic (watch [this video](#)).

New Ocular-Motor MCT Dissertation

Congratulations to Dr. Andrew C. Potts for receiving approval of his dissertation from the University of Utah. The dissertation, titled "1, 2, 3 Crimes You're Out: Ocular-Motor Methods for Detecting Deception in a Multiple-Issue Screening Protocol," investigated whether ocular-motor measures can differentiate between truthful and deceptive individuals and identify the specific crime deceptive individuals committed on a test that asks about four relevant issues.

Dr. Potts, a former Converus employee and a member of the Converus Science Team, completed this dissertation in partial fulfillment of the requirements for earning the degree of Doctor of Philosophy. You can read the dissertation [here](#).

Welcome New Service Partner

A warm welcome to Life Renewal Therapy (Utah) who is our newest Converus Service Partner.

We continue to attract the best of the best in the credibility assessment industry. (Want to become a Converus Service Partner? Click [here](#).)

Click the forward button above to send this newsletter to others interested in our advanced credibility assessment tools. And please share industry news with us! We'd love to hear from you. Email: info@converus.com.

About Converus

Converus provides scientifically validated credibility assessment technologies. EyeDetect® detects deception at 86-90% accuracy in 15-30 minutes by analyzing eye and other behaviors. IdentityDetect® detects falsified identities at 91% accuracy in about 1-3 minutes by analyzing subtle variations in the somatic nervous system. These technologies help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: www.converus.com
