Message from Converus President and CEO How Governments Worldwide Benefit from EyeDetect

Hi,

Whether it's in the U.S., Latin America, Caribbean, Asia or Europe, the role EyeDetect is playing in governments worldwide is significant.

EyeDetect is currently used by federal government agencies in 14 different countries. Entities such as military divisions, crime investigative units and law enforcement departments — as well as other federal, state and local agencies — use EyeDetect to prescreen job applicants, monitor employees for insider threats, conduct criminal investigations, and more.

New EyeDetect Video

Our latest video outlines 7 key ways EyeDetect helps government agencies. It also features a real story how one government identified soldiers that robbed a cellular phone store while wearing government-issued military uniforms!

Watch this new video [here](#). Please share this video with others that work for a government agency.

New Case Study

You'll also enjoy reading our new case study about how EyeDetect helps public safety agencies more effectively screen lateral transfers. When considering applicants with prior experience at a law enforcement, fire department or other public safety agency, some agencies are inclined to hire these candidates rather than conduct a background check.

But that opens the door to potentially hiring a "bad apple." To help ensure just the best are hired, EyeDetect allows agencies to better scrutinize these applicants' track record by asking questions about previous employment, including any unreported disciplinary action, engaging in the misappropriation of evidence, mishandling a suspect's property, and more.

Read our new case study [here](#).

About Converus

Converus provides scientifically validated credibility assessment technologies. EyeDetect® detects deception at 86-90% accuracy in 15-30 minutes by analyzing eye and other behaviors. IdentityDetect® detects falsified identities at 91% accuracy in about 1-3 minutes by analyzing subtle variations in the somatic nervous system. These technologies help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: www.converus.com
