

## Security Company Saves Up to \$21,000 monthly using EyeDetect to Screen Job Candidates

*“Because of EyeDetect, turnover and layoffs began to shrink immediately throughout 2020.”*

### BACKGROUND

[Yrendagüe S.A.](#) is a security company based in Paraguay since 1980. It provides security services, physical surveillance, transportation, and comprehensive value management. It has 30 transport trucks and 300 employees. The company's mission is: “To ensure the safety of our customers, protecting their property and interests, with social responsibility.”

### CHALLENGE

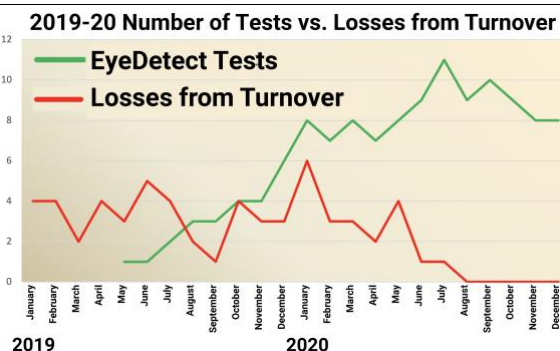

Some of the company's HR challenges included high employee turnover, resignations and staff dismissals. Turnover rates were representative of the entire segment of armored/safety companies. Yrendagüe had an average of 3 dismissals per month, along with high labor costs.

### EYEDTECT IMPLEMENTED

In May 2019, Yrendagüe began performing pre-employment monitoring with EyeDetect. At first, they only administered a few tests to see how it would work, but then the number of monthly EyeDetect tests significantly increased.

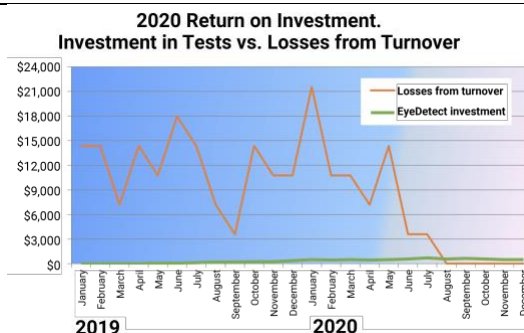

### RESULTS

With EyeDetect, turnover and layoffs began to decline immediately throughout 2020. There was a direct correlation between the use of EyeDetect and the number of dismissals that had to be made.

### RETURN ON INVESTMENT

The return on investment resulting from the systematic use of EyeDetect in pre-employment has been remarkable. In a little over a year, Yrendagüe reduced its turnover costs from a maximum of \$21,000 a month to \$0.
