Converus Releases Yet Another Credibility Assessment Innovation: The Automated Polygraph

Hi

The 2014 EyeDetect announcement was a milestone in the credibility assessment industry.

Now, 7 years later, on May 25 during our Converus CONNECT '21 conference, I announced another major innovation — EyeDetect+ 2.0, an automated polygraph.

It just so happens to come exactly 100 years after the invention of the polygraph in 1921. (See this [timeline](#).)

EyeDetect+ 2.0 is the convergence of EyeDetect + polygraph. It assesses credibility by monitoring and recording physiological activity — similar to polygraph — as well as the same ocular data from a standard EyeDetect test. EyeDetect+ is revolutionary because it automates testing and makes it impartial, accurate, and less intrusive than a polygraph.

This is significant. An automated polygraph testing process means **more reliable testing and valid data analysis**.

Another substantial advancement of EyeDetect+ 2.0 is the elimination of the blood pressure arm cuff. Now, blood pressure activity is measured with small sensors attached to the examinee's wrists.

A Perfect, Credible Marriage

EyeDetect and polygraph are the world's two proven, most respected, most accurate and most utilized credibility assessment technologies. Now, for those that rely on polygraph — either for personal preference, organizational requirements, or laws within their jurisdiction — an updated, more advanced polygraph examination is now available.

You should [read what some of the world's leading polygraph experts have to say](#) about this invention. And here's an insightful [comparison chart](#) of leading credibility assessment tools.

However, I can't sufficiently emphasize that the original version of EyeDetect remains the perfect choice for those that want a noncontact, highly accurate, fast and fully automated solution. More than 600 customers worldwide use our flagship technology, and that number continues to grow.

We are now taking orders for EyeDetect+. Contact your local authorized service partner for pricing and availability. Or contact us at +1 801.331.8840 or by email at info@converus.com

For more information on our automated polygraph, watch this [video](#) and read this [flyer](#) and [press release](#).

Next month I'll report on our CONNECT '21 conference.

Click your email "forward" button to send this email to others interested in credibility assessment. And please share industry news with us! We'd love to hear from you. Email: info@converus.com.

About Converus

Converus provides scientifically validated credibility assessment technologies. EyeDetect®, which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, scalable, and fully automated option to polygraph. EyeDetect+ is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the EyeDetect product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
