EyeDetect+ Gets Conclusive Results at APA Seminar

Hi,

We showcased EyeDetect+ — the world's first automated polygraph — in Austin, TX at the 55th Annual American Polygraph Association (APA) Seminar that ended Sept. 2, 2021. With over 500 attendees, it was the perfect audience to display the next evolution in polygraph technology.

Of all the vendor displays, we were undeniably the busiest. There was great interest in EyeDetect+. One examiner commented, "Every time I come by here, you guys are swarmed."

Attendees included independent and government polygraph examiners from around the world, as well as private companies outside the U.S., and treatment centers. After personally experiencing EyeDetect+, most examiners concluded that it is indeed a polygraph.

We're excited because it combines the world's top 2 lie detection technologies to measure and record ocular data and physiological data with greater accuracy and less invasiveness.

With an old car commercial in mind, I say "this is not your parent's polygraph."

One polygraph examiner commented after taking an EyeDetect+ test, "This was a standard DLST polygraph with the exception of the test being administered by a computer."

We held an open house one evening at the event and I took Q&A for 2 hours. This gave me time to answer many technical questions regarding EyeDetect+.

We appreciate the opportunity to attend the event. EyeDetect+ is our contribution to further the advancement of credibility assessment during the centennial celebration of the invention of the modern-day polygraph.

New Service Partner/New Service Partners
A warm welcome to our new Converus Service Partners:

- Mosaic Psychological Services (GA)
- Sun Rise Therapy, Ltd (Canada)

We continue to attract the best of the best in the credibility assessment industry. (Want to become a Converus Service Partner? Click here.)

Click your email "forward" button to send this email to others interested in credibility assessment. And please share industry news with us! We'd love to hear from you. Email: info@converus.com.

Converus at APA Seminar

Lie Detection. Reinvented.

Polygraph examiners worldwide are updating to EyeDetect, the most technologically advanced credibility assessment tool for verifying truth.
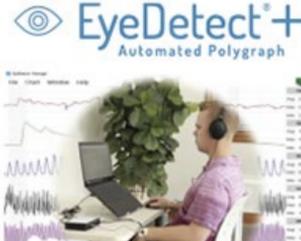

EyeDetect®
The eyes don't lie.

Ocular Lie Detector

√ Noninvasive
√ Fast (15-30 min.)
√ Accurate (86-88%)
√ Affordable
√ Unbiased

EyeDetect+
Automated Polygraph

Automated Polygraph

√ Noninvasive
√ Physiological activity + ocular data
√ Less invasive (no blood pressure cuff)
√ Impartial / automated
√ Accurate (89-91%)
√ Fast (20-45 min.)

Upcoming Events

**Free EyeDetect Standard & Advanced Training
(Includes training on EyeDetect+ 2.0)**
Date: Nov 16-18, 2021 (3 days)
Time: 11 a.m. to 3:30 p.m. Eastern Time - each day
Click to register or see the agenda
(online using MS Teams)

This course will also be offered in Spanish on Nov. 9-11. Click to register or see the agenda.

About Converus

Converus provides scientifically validated credibility assessment technologies. EyeDetect®, which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, scalable, and fully automated option to polygraph. EyeDetect+ is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the EyeDetect product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
