

Product Update – December 1, 2021

Converus updated the EyeDetect Dashboard **Test Report** and the **EyeDetect+ Manager** software at 6:30 p.m. MT on Wednesday, December 1, 2021. This document summarizes those changes and improvements.

Test Report: Converus Credibility Result for Probable Confession

In an MCT test, if an examinee reacts to one or more topics AND makes a “probable confession” to one or more topics, the report will now indicate which issue(s) was a probable confession while also indicating truthful/deceptive scores for other topics. Previously, the test report only indicated truthful/deceptive scores.

A probable confession occurs when an examinee answers a high percentage of test questions in an unexpected manner—essentially admitting participation in the target issue. In the image below, the R1 issue was scored as “probable confession,” which indicates guilt for that issue.

The Dashboard will now indicate a “–” for any issue scored as **Probable Confession**. In the image below, the R1 issue was a “probable confession.”

Test Report: Conclusion Updated

The conclusion section, which explains test results in paragraph form, is now more concise.

Test Report: Explanation of Examinee Answers Added

A section entitled “Explanation of Examinee Answers” has been added and follows the Conclusion section. It mentions that “expected” answers (assuming the person is innocent) indicate denial of participation in the issue in question. Also, “unexpected” answers indicate the examinee either admitted to participation in the issue, intentionally answered contrary, misunderstood the question, or accidentally selected the unexpected answer.

Test Report: Test Response Summary Changes

1. The Test Response Summary table was renamed “Summary of Examinee Answers.”
2. The phrase “Test Questions - Incorrect” was renamed “Unexpected Answers.”
3. The phrase “Test Questions - Timed Out” was renamed “Unanswered Questions.”

Summary of Examinee Answers						
	Involvement with illegal drugs (R1)	Participation in fraudulent activities (R2)	Committing a serious crime (R3)	Ties to terrorists (R4)	Neutral (NT)	Overall
Unexpected Answers	83%	5%	6%	5%	0%	25%
Unanswered Questions	0%	0%	0%	0%	0%	0%

Test Report: Test Response Detail Section Changes

1. The Test Response Detail table has been renamed “Answer Detail” with (R#) indicating the relevant issue. In the image below, this is the R2 section.
2. The Legend section previously referred to “Correct,” “Incorrect,” and “Timed Out” responses has been renamed “Expected Answer,” “Unexpected Answer,” and “Timed Out” answer.
3. The phrase “Correct Answer” has been renamed “Expected Answer.”
4. Green, red, and yellow squares correspond to the labels in the Legend and indicate examinee answers with a T, F, Y, or N to indicate True or False for standard tests and Yes or No for hybrid tests.
5. The phrase “Self-Incriminating” has been renamed to refer to the % of “Unexpected Answers.”

Answer Detail (R2)		Legend: ■ Expected Answer ■ Unexpected Answer ■ Timed Out					
Statement	Expected Answer	Examinee's Answer					Unexpected Answers
		S1	S2	S3	S4	S5	
I have not participated in fraudulent activities in the past.	3	T	T	T	T	T	5
I am innocent of participating in fraudulent activities.		T	T	T	T	T	
In the past, I have not participated in any acts of fraud.	True	T	F	F	T	T	40%
I have never participated in fraudulent activities.	True	T	T	T	F	T	20%
I was never involved in any acts of fraud.	True	T	T	T	T	T	0%
In the past, I have not participated in fraudulent activities.	True	T	T	T	T	T	0%
I was involved in fraudulent activities in the past.	False	F	F	F	F	F	0%
I admit to participating in acts of fraud in the past.	False	F	F	F	F	F	0%
I am guilty of participating in fraudulent activities.	False	F	F	F	F	F	0%
In the past, I have participated in acts of fraud.	False	F	F	F	F	F	0%
I participated in fraudulent activities in the past.	False	F	F	F	F	F	0%
In the past, I was involved in fraudulent activities.	False	F	F	F	F	F	0%

EyeDetect+ Manager Software Updates

1. The order in which the polygraph signals appear in EyeDetect+ Manager is now the same as the signals appear in the Test Report on the Converus Dashboard.
2. Examiners/Test Proctors can now make manual polygraph annotations during an EyeDetect+ test.
3. Examiners/Test Proctors can now manually advance the test question in a Hybrid EyeDetect+ Test.
4. Examiners/Test Proctors can now manually stop an EyeDetect+ test running on the EyeDetect Station from within the EyeDetect+ Manager software using the Send "F10" key button.
