Message from Converus President and CEO

"You are the future of polygraph"

Hi,

The other day, a well-respected polygraph expert said to me:
"Converus technology is the future of polygraph."

All technologies evolve and polygraph is no exception. In 1991, thanks to Kircher and Raskin (who became members of the [Converus Science Team](#)), the polygraph was computerized.

Then, 20 years later in May 2021, Converus introduced EyeDetect+, the world's first automated polygraph, under the direction of John Kircher. It measures and records the same channels as a polygraph, removes the arm cuff, and adds ocular data.

We'll sponsor and attend the [57th APA Annual Seminar](#) in Las Vegas (Aug. 28 to Sep. 1) to share how EyeDetect+ makes testing easier and faster. If you attend the APA Seminar, stop by our display for a quick demo. We'd love to see you.

Police Recruitment Event

I participated in the 12th Annual Police Recruitment & Retention Summit this month in Las Vegas. (Read [press release](#).) I felt we were clearly "the talk" of the event. We gave the first presentation, along with Converus Service Partner Dan Watson of [Watson & Associates](#), right after the keynote.

During the presentation, unknown to me, someone from Fairbanks PD (Alaska) made a comment something like, "We use EyeDetect and we love it!"

Our booth was absolutely slammed during the cocktail reception and every break. We ran 35 number tests. On 33 tests, EyeDetect indicated the correct number the examinee selected in the first position. For the other two, EyeDetect indicated the correct number in the second position. Those are impressive stats!

Nearly 200 participants representing 80 law enforcement agencies attended this bi-annual event. We expect several new agencies to join the more than 80 agencies that use EyeDetect now.

VerifEye "Pre-pre-employment" Tests

Several companies in Mexico now use [VerifEye](#) for "pre" pre-employment tests. Such tests offer 3 benefits:

1. **Tests practically FREE** – No equipment cost. No test administration personnel involved. Just send a VerifEye test link to the applicant (low cost).
2. **No travel** – Job candidates self-test at home. No need to visit the office. Expands the geography of the applicant pool.
3. **Best applicants** – Eliminate the non-qualified and focus on the best applicants.

New Service Partner

A warm welcome to our new Converus Service Partner, Forcop Seguridad Forense e Investigación, from Ecuador.

We continue to attract the best of the best in the credibility assessment industry. (Want to become a Converus Service Partner? Click [here](#).)

Click your email "forward" button to send this email to others interested in credibility assessment. And please share industry news with us! We'd love to hear from you. Email: info@converus.com.

Free EyeDetect & VerifEye Virtual Training

The next virtual training dates will be held in November. Click [here](#) for more information about training.

We have had inquiries about attending an in-person training. If you are interested, please click [here](#).

About Converus

Converus provides scientifically validated credibility assessment technologies. [VerifEye](#)™ is the world's first mobile app to help organizations or individuals accurately verify the truth about a person — including background, identity, creditworthiness and claims — in about ten minutes. [EyeDetect](#)®, which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, scalable, and fully automated option to polygraph. [EyeDetect+](#) is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the EyeDetect product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: [converus.com](#)
