Message from Converus President and CEO

EyeDetect+ Meets APA's EDA Standard

Hi,

I'm excited to announce polygraph examiners have another reason to use the award-winning EyeDetect+ as their automated instrument of choice: EyeDetect+ complies with the EDA (electrodermal activity) signal processing standard adopted by the APA last month. Converus collaborated with other U.S. polygraph instrument manufacturers to define the standard.

Popularity of Mobile App VerifEye Grows

The VerifEye customer base is growing by 200 to 300% per month. We now have customers in 8 countries that have discovered great value in using VerifEye to:

- Pre-screen potential hires
- Verify the credit risk of loan applicants
- Assess the credibility of one's fidelity

I also want to congratulate **Phone Infidelity Test**, a Converus Service Partner, for launching their new website offering VerifEye tests online. Visit: phoneinfidelitytest.com

New Service Partner

A warm welcome to our new Converus Service Partner, PC Investigative Solutions, in Georgia.

We continue to attract the best of the best in the credibility assessment industry. (Want to become a Converus Service Partner? Click [here](#).)

Click your email "forward" button to send this email to others interested in credibility assessment. And please share industry news with us! We'd love to hear from you. Email: info@converus.com.

We have had inquiries about attending an in-person training. If you are interested, please click [here](#).

About Converus

Converus provides scientifically validated credibility assessment technologies. [VerifEye](#)™ is the world's first mobile app to help organizations or individuals accurately verify the truth about a person — including background, identity, creditworthiness and claims — in about 10 minutes. [EyeDetect](#)®, which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, scalable, and fully automated option to polygraph. [EyeDetect+](#) is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the EyeDetect product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
