Message from Converus President and CEO

Polygraph & EyeDetect Help Exonerate Olympic Athlete of Doping Accusation; VerifEye 2.0 & New Videos Released

Hi,

October is a big news month for Converus...

EyeDetect Helps Prove Olympian's Innocence

News broke on Oct. 19 that EJ Obiena, a gold medal Olympic pole vaulter from the Philippines, had passed a polygraph and EyeDetect test to clear his name of doping accusations. He also passed 34 separate doping control tests administered under the supervision of the World Anti-Doping Agency, further confirming he didn't use banned substances or performance-enhancing drugs during his pole-vaulting career.

More than a 100 news outlets worldwide have reported on this story, including [CNN Philippines](#), [The Manila Times](#) and [BusinessMirror](#).

VerifEye 2.0 & New Videos Released

During October we released version 2.0 of the [VerifEye](#) app. This new version includes major improvements in the user interface (accessibility to a demo test), eye tracking, test processing time and accuracy.

Usage of the world's first truth verification app is growing exponentially — especially in the areas of pre-employment screening and credit risk verification. Check out these newly created, 2-minute videos on these use cases:

- [VerifEye Pre-employment Screening video](#)
- [VerifEye Credit Risk Verification video](#)

To schedule a demonstration of how VerifEye can help streamline your organization's hiring process or reduce your credit risk, email: info@converus.com. Your organization may even qualify for a free, no-obligation VerifEye test drive.

In addition to English and Spanish versions, VerifEye 2.0 includes support for 13 additional languages, which are:

- Bulgarian
- Chinese Traditional
- English
- French (Canada)
- Gujarati
- Hindi
- Malay
- Norwegian
- Portuguese
- Romanian
- Russian
- Spanish
- Filipino
- Thai
- Ukrainian

New Service Partners

A warm welcome to our new Converus Service Partners:

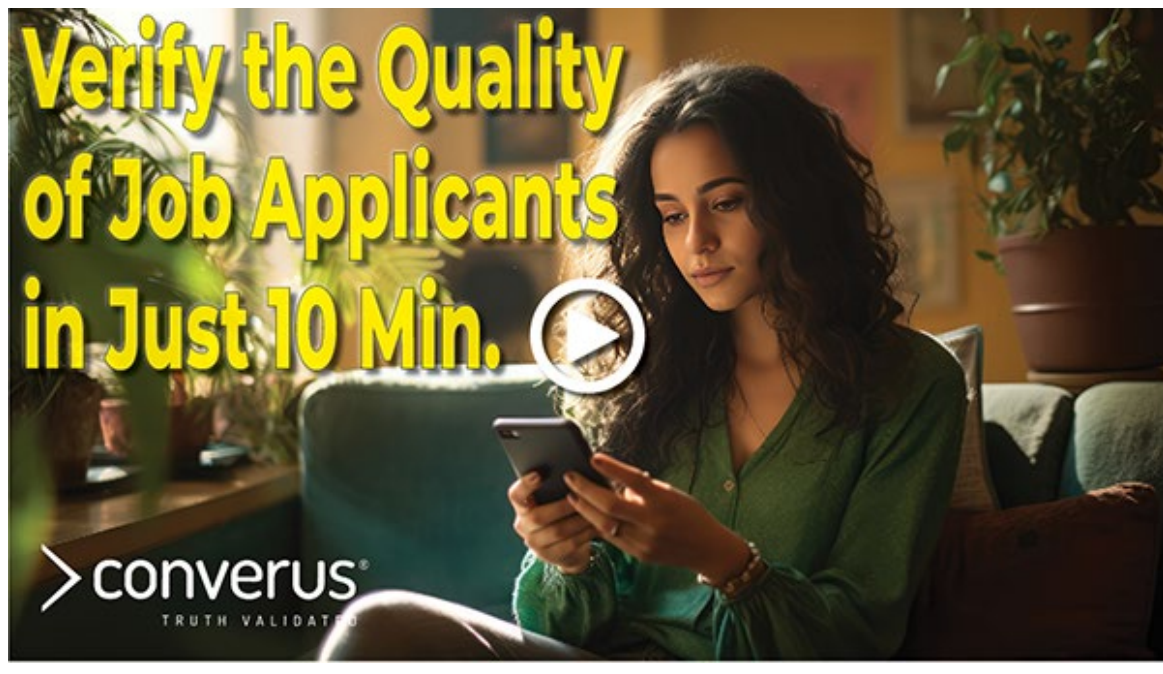

- Crosspoint (Colorado)
- Samart Communication Service Co. (Thailand)

We continue to attract the best of the best in the credibility assessment industry. (Want to become a Converus Service Partner? Click [here](#).)

Click your email "forward" button to send this email to others interested in credibility assessment. And please share industry news with us! We'd love to hear from you. Email: info@converus.com.

We have had inquiries about attending an in-person training. If you are interested, please click [here](#).

About Converus

Converus provides scientifically validated credibility assessment technologies. [VerifEye™](#) is the world's first mobile app to help organizations or individuals accurately verify the truth about a person — including background, identity, creditworthiness and claims — in about 10 minutes. [EyeDetect®](#), which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, scalable, and fully automated option to polygraph. [EyeDetect+](#) is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the EyeDetect product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
