Message from Converus President and CEO

How 1 Change Can Lead to 5 Benefits for Polygraph Examiners

Hi,

Every New Year is a great time to resolve to be a better version of yourself and to make improvements.

In this issue, I direct my comments toward those working in the credibility assessment industry as polygraph examiners. Thanks to my mentors — Dr. John Kircher, Dr. David Raskin, Dr. Doug Hacker, and Don Krapohl — I believe I understand the challenges faced in this industry.

When John and Doug first conceived of the idea of developing a new lie detector in 2002 (read the fascinating story [here](#)) to detect deception from a person's eyes, little did they know it would eventually allow polygraph examiners to:

- Test more consistently.
- Obtain high rates of accuracy and reliability.
- Conduct up to 10 or more screening tests a day.
- Test examinees unsuitable for polygraph.
- Train a test proctor in a few hours (to assist in running even *more* tests).

But I understand change is hard. However, I'm not asking anyone to abandon their instrument of choice. Instead, I'm asking you to consider adding one new credibility assessment technology to your tool chest that can help advance your career, your value, and give you a competitive edge.

Fair enough? [Watch this new video](#) made specifically for polygraph examiners.

I wish you a happy and prosperous 2024. Be sure to check out the other good news in this issue, including our participation in the 13th Police Recruitment & Retention Summit Feb. 20-22 in Las Vegas.

New Service Partners

A warm welcome to our new Converus Service Partners:

- Sayan Enterprises (Nepal)
- Yungyi International Co. Ltd. (Taiwan)

We continue to attract the best of the best in the credibility assessment industry. (Want to become a Converus Service Partner? Click [here](#).)

Click your email "forward" button to send this email to others interested in credibility assessment. And please share industry news with us! We'd love to hear from you. Email: info@converus.com.

This course will also be offered in Spanish on March 19-21. Click [here](#) for Spanish registration and agenda

We have had inquiries about attending an in-person training. If you are interested, please click [here](#).

About Converus

Converus provides scientifically validated credibility assessment technologies. [VerifEye™](#) (U.S. patent pending) is the world's first mobile app to help organizations or individuals accurately verify the truth about a person — including background, identity, creditworthiness and claims — in about 10 minutes. [EyeDetect®](#), which detects deception by measuring involuntary behavior, is a fast, accurate, affordable, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the EyeDetect product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
