

CHIEF OPERATING OFFICER MESSAGE | RUSS WARNER

Helping Hands, Powered by VerifEye: ADRA Success Story

Hi,

This is a fascinating story of how [VerifEye](#), a new truth verification app, helps a humanitarian aid organization in Mexico...

[ADRA International](#) is a global humanitarian aid organization that helps vulnerable communities worldwide. They fight the good fight — providing aid and support. The office in Mexico faced a challenge in finding and managing its field staff working with children. And in this sector, transparency is key.

ADRA Mexico teamed up with CONSINFO, a local Converus Service Partner, to implement VerifEye to find truthful recruits and monitor existing staff. Now, they have added an extra layer of confidence to their operations.

The results were immediate and heroic. They reduced risk by hiring honest applicants, increased efficiency in the hiring and managing process, and — most importantly — now deliver aid more effectively to vulnerable communities.

Want to dive deeper into this inspiring story? [Click here](#). You'll be amazed at how VerifEye is changing the world, one good deed at a time.

What's the takeaway? VerifEye enables organizations like ADRA to quickly identify individuals who may be a potential risk to their organization or to the people they serve. Potential recruits can be instantly vetted by simply sending a link to their mobile phone and having them self-administer a test anywhere and anytime.

Regards,

Russ

ABOUT CONVERUS

Converus provides scientifically validated credibility assessment technologies. [VerifEye](#)™ (U.S. patent pending) is the world's first mobile app to help organizations or individuals accurately verify the truth about a person — including background, identity, creditworthiness and claims — in about 10 minutes. [EyeDetect](#)®, which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, scalable, and fully automated option to polygraph. [EyeDetect+](#) is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
