Expand Your Expertise: New Training Options for Credibility Assessment Experts

Hi,

The world of credibility assessment is ever-evolving. We've [expanded our training offering](#) to keep you on the cutting edge and to focus on the advanced technologies that best meet your needs.

Our training offering now includes:

1. **Training Needs Assessment:** with our guidance, determine which training is best for your organization
2. **Online, self-paced:** free online access to all training materials for self-guided study
3. **Workshops:** participate in free, 60-minute calls with a Converus trainer to discuss general topics; available monthly
4. **Consultation:** participate in free, 45-minute virtual meetings with a Converus trainer to discuss specific topics or questions
5. **Online, customized training:** a Converus trainer will create a plan for virtual, customized training for your organization (fees apply)
6. **Onsite, customized training:** a Converus trainer will create a plan for onsite, customized training for your organization (fees apply)

This training offering replaces the virtual sessions we previously held in March, July and November.

The assessment will ensure we understand your current equipment, certifications and needs. From there, you'll have access to options, including self-paced online courses, group workshops, one-on-one consultations, and fully customized training (online or onsite) for your team.

Whether it's EyeDetect, EyeDetect+ or VerifEye, our six training choices are designed to help enhance your skills and improve your assessments by adding valuable, scientifically validated tools to your credibility assessment toolbox.

For polygraph examiners looking to expand their expertise, these new offerings can help you add valuable options to your toolbox — making you more versatile and efficient in your work.

Explore your options today and update your credibility assessment skills and certification by visiting the [Converus Training & Certificate](#) website page.

Your success is our priority, and we're excited to support your journey toward even greater credibility assessment accuracy and efficiency.

Sincerely,

Todd Mickelsen
President & CEO

P.S. - Forward this email to others interested in the world's most advanced credibility assessment technologies. If you have industry news or would like to share your experience using EyeDetect or VerifEye, we'd love to hear from you. Email info@converus.com.

ABOUT CONVERUS

Converus provides scientifically validated credibility assessment technologies. [VerifEye™](#) (U.S. patent pending) is the world's first mobile app to help organizations or individuals accurately verify the truth about a person — including background, identity, creditworthiness and claims — in about 10 minutes. [EyeDetect®](#), which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, scalable, and fully automated option to polygraph. [EyeDetect+](#) is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
