

CEO MESSAGE | TODD MICKELSEN

VerifEye's Time Has Come – Take Demo, See How EASY it is to Use

Hi,
I have two exciting updates that make [VerifEye](#) even more compelling for Converus customers and Service Partners.

1. Try the New VerifEye Test Drive – No Sign-Up Required

We've launched a new [VerifEye Test Drive](#) that lets you experience how the app works in real time as a test taker, as well as view the progress as a test administrator, right on your smartphone. No sign-up required.

This test drive simulates one of VerifEye's many real-world uses: verifying a person's identity by analyzing involuntary eye behavior.

In just minutes, you'll see VerifEye's speed, ease and flexibility in action.

Where VerifEye Shines:

- **Hiring:** Effortlessly screen remote job applicants and contractors.
- **Monitoring:** Periodically assess trust levels among key personnel, especially remote workers.
- **Fraud Prevention:** Detect deception and verify claims in business operations.
- **Identity/Credit Verification:** Confirm identity for access control or verify credit risk.

Experience the VerifEye Test Drive [here](#).

2. VerifEye Is Easier Than Ever to Deploy

VerifEye has reached a new level of maturity — it's accurate, stable, proven, and incredibly easy to deploy. Watch one of the following new videos on VerifEye to learn more:

- [Quick Intro to VerifEye](#) (4 minutes)
- [A Quick Start to VerifEye for EyeDetect Users](#) (19 minutes)

VerifEye customers with little or no technical experience are now running hundreds of tests monthly.

- No programming or website integration required
- Send VerifEye test links right from your Converus dashboard
- Monitor test-taker progress from your Converus dashboard
- Access test results from your Converus dashboard

Real-World Example

One company used to drive 3 to 4 hours to test applicants with EyeDetect or polygraph in remote locations — only to discover some had disqualifying issues and couldn't be hired. Now with VerifEye, they pre-screen candidates **remotely** and only travel when it's truly worth it.

VerifEye can be **self-administered**, making it ideal for testing remote applicants — a solution that's often too costly or logistically difficult for polygraph or in-person EyeDetect tests.

—>Already have EyeDetect licenses? Swap them for VerifEye licenses.

VerifEye Complements EyeDetect and Polygraph

It's not about replacing your current tools — it's about using the right solution for each situation.

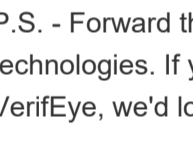

Here are two practical ways to integrate VerifEye into your current workflow:

1. Pre-screen remote applicants by sending VerifEye test links to them so they can self-administer the test with their own mobile phone and then bring them in for additional testing with EyeDetect or polygraph.
2. Don't have enough EyeDetect Stations or polygraph examiners for the locations where you need to run tests? Use a mobile phone and tripod to run VerifEye tests in Proctor Mode in a controlled environment — just like you do with an EyeDetect or polygraph test.

When VerifEye tests are proctored in a controlled environment with a quality smart phone, lab studies show you can **achieve up to 89% accuracy**.

Whether you're just getting started or ready to expand, *now's the time to embrace VerifEye*.

Watch the new [VerifEye Introduction video](#), [VerifEye Quick Start for EyeDetect Users video](#), or [email us](#) for more info.

Best,

Todd Mickelsen
President & CEO

P.S. - Forward this email to others interested in the world's most advanced credibility assessment technologies. If you have industry news or would like to share your experience using EyeDetect or VerifEye, we'd love to hear from you. Email info@converus.com.

UPCOMING EVENTS

WORKSHOPS

Take advantage of a new training option from Converus. Join us on a free, 60-minute Teams call with a Converus expert to discuss specific topics. Learn more [here](#).

Aug. 4-6, 2025 – 16th Police Recruitment and Retention Summit - St. Louis, MO

Todd Mickelsen of Converus and Michael Molson of Greensboro Police Department will speak about Strategies to Streamline Applicant Screening, Reduce Risk, and Hire Quality Candidates.

Aug. 24-29, 2025 – APA 59th Annual Seminar and Workshop - San Diego, CA

Russ Warner of Converus will speak on Tuesday 8/26 from 8-10AM at the Seminar. Spanish available.

ABOUT CONVERUS

Converus provides scientifically validated credibility assessment technologies. [VerifEye](#)® (U.S. patent pending) is the world's first mobile app to help organizations or individuals accurately verify the truth about a person — including background, identity, creditworthiness and claims — in about 10 minutes. [EyeDetect](#)®, which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, scalable, and fully automated option to polygraph. [EyeDetect+](#) (U.S. patent pending) is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
