

CEO MESSAGE | TODD MICKELSEN

Greensboro PD and Talma Innovate and Transform with EyeDetect® & VerifEye®

Hi,

It's always exciting to share how customers successfully leverage our technology to meet their critical needs. Today, we announce two new success stories that perfectly illustrate the breadth and power of [EyeDetect](#) and [VerifEye](#) across different industries and continents.

EyeDetect Case Study- Pre-Employment Screening of Police Applicants at Greensboro PD

The Greensboro Police Department (GPD) in North Carolina has a critical mission to maintain public trust and safety. GPD adopted EyeDetect for pre-employment screening of job applicants. By using EyeDetect to objectively and efficiently vet job applicants, Greensboro Police are setting a new standard for integrity in their hiring, ensuring that only the most trustworthy candidates are brought into the department.

This showcases the power of EyeDetect as a non-intrusive, scalable tool for organizations focused on maintaining the highest ethical standards right from the start.

VerifEye Case Study- Ongoing Employee Evaluations and Investigations at Talma

Talma is a major airport services company based in Medellin, Colombia. They use VerifEye to periodically test current employees. This process has become instrumental in conducting timely and objective investigations into specific behaviors, including fraud, theft, and security breaches.

VerifEye allows Talma to quickly address internal issues, maintain a secure operational environment, and reinforce a culture of accountability among its workforce.

Flexibility and Versatility

These two examples underscore the flexibility and versatility of **EyeDetect** in ensuring integrity before the hire, and **VerifEye** in helping maintain it throughout an employee's career.

Organizations like the Greensboro PD and Talma demonstrate the powerful impact of objective credibility assessments in the modern workplace.

If you wish to learn more about how these solutions can be tailored to your organization's unique screening and investigation requirements, just let me know.

60th International HR Congress (AMEDIRH)

This month, we participated in the 60th International Human Resources Congress in Mexico City. We showcased [VerifEye](#) to HR professionals from the region as a quick, remote pre-screening tool for job applicants.

9th International Association of Polygraph Professionals (AIPP)

We also participated in the 9th AIPP Congress in Medellin, Colombia. Pablo Barrios of Converus gave a presentation on using EyeDetect in a [Successful Hurdles](#) model with polygraph, which can yield 98-99% outcome confidence (the probability that the test result is correct). Mark Handler was the first to publish a [paper](#) on this topic in 2016.

Thank You

Thank you for your continued interest in Converus products and commitment to building more trustworthy organizations worldwide.

Best,

Todd

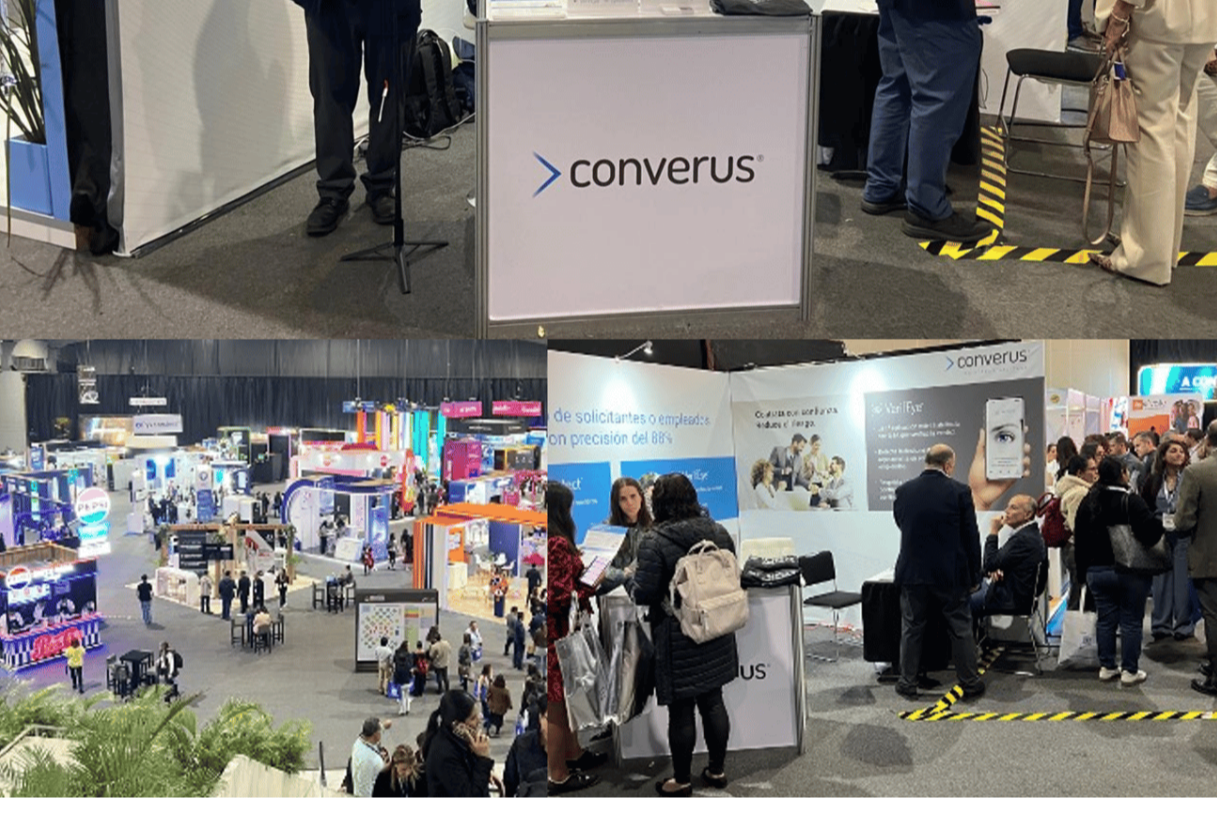

Todd Mickelsen
President & CEO

P.S. - Forward this email to others interested in the world's most advanced credibility assessment technologies. If you have industry news or would like to share your experience using EyeDetect or VerifEye, we'd love to hear from you. Email info@converus.com.

ABOUT CONVERUS

Converus provides scientifically validated credibility assessment technologies. [VerifEye](#)® (U.S. patent pending) is the world's first mobile app to help organizations or individuals accurately verify the truth about a person — including background, identity, creditworthiness and claims — in about 10 minutes. [EyeDetect](#)®, which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, and fully automated option to polygraph. [EyeDetect+](#) (U.S. patent pending) is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
